DETAILED ACTION

Applicant's amendment, filed 08/21/2007, has been entered.

Claims 2 and 7 have been canceled.

Claims 12-13 have been added.

Claims 1, 3-6, 8-13 are pending and currently under Restriction Requirement set forth herein.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a pharmaceutical composition comprising Annexin V.

Group II, claim(s) 3-5 and 10 drawn to a method of treating a subject at risk of atherothrombosis and/or plaque rupture comprising administering to said subject a pharmaceutical composition comprising an effective amount of Annexin V.

Group III, claim(s) 6 and 12, drawn to a pharmaceutical composition comprising a purified subfraction of pooled immunoglobulins with the capacity to inhibit antibodies binding to Annexin V, or a purified subfraction of pooled immunoglobulins with the capacity to promote binding of Annexin V to endothelium.

Group IV, claim(s) 8-9, 11 and 13, drawn to a method of treating a subject at risk of atherothrombosis and/or plaque rupture comprising administering to said subject a pharmaceutical composition comprising an effective amount of pooled immunoglobulins with the capacity to inhibit antibodies binding to Annexin V or a purified subfraction of pooled immunoglobulins with the capacity to promote binding of Annexin V to endothelium.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the shared technical feature of the present invention is a pharmaceutical composition comprising Annexin V. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in prior art. For example, Blankenberg et al. (US 2003/0152513 A1, cited on IDS) taught a pharmaceutical composition comprising Annexin V (see, e.g., claims 5 and 6). Therefore, the technical feature in the instant case does not make a contribution over prior art thus the unity of invention does not exist.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 C.F.R. 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
